

## Robbery Prevention Seminars

*Robbery occurs every 60 seconds while Violent Crimes occur every 35 seconds. Envision Security Partners is committed to ensuring you have the knowledge, training, and power to be able to combat these alarming statistics.*

### *are you ready?*

**Envision Security Partners'** Robbery Prevention Seminars are designed to educate employers, supervisors, and support staff on the complicated facets of violent crime. Envision Security Partners' Robbery Prevention Seminars provide:

- In depth information regarding the violent crime of robbery
- Techniques on robbery prevention
- Appropriate responses during and after a robbery
- The importance of effective policies and procedures

***This seminar will not only educate the participants with the latest robbery trends and statistics, but also will provide factual information on typical robbery scenarios, as well as the typical robber.***

***The goal in the event of a robbery is a "successful incident" where no one is hurt. Is everyone on your staff prepared?***

Providing an increased level of awareness to employers and support staff will reduce chances of becoming a viable target, reduce liability by having trained and knowledgeable employees, and increase chances of suspect apprehension, should a robbery occur.

At Envision Security Partners, we are continually helping Banking/Finance, Retail and Convenient Store professionals protect and empower people to the safest power!
